[5.0 out of 5 stars](#) By [Dr. David Baltimore](#) on June 5, 2017 Format: Kindle Edition

What fun this book is. The stories from the author's online dating experience are too bizarre to be anything but true. And the main character in this novel is the definition of tenacious; for five long years she rode the roller coaster of online dating sites.

Although written primarily from the woman's point of view, and therefore most appreciated by women readers, I think every guy considering online dating should read this book. Although in an easy-to-read novel format, it is a how-to and how-NOT-to of online dating. Well written, engaging, funny, and heartfelt, I found myself very drawn to Laura, the protagonist, and would have liked to punch out a few of her coffee dates!

I so enjoyed this book! The writing is superb. I can “hear” and feel Laura. It is so heartfelt without being maudlin or too-too. And what a terrific injection of FUNNY!!??? Funny! When I started reading it I couldn't put it down and went way past by bedtime, but I was rapt. This book is absolutely wonderful.

This book is delightful, spiritually heartfelt and what a terrific injection of FUNNY!! You'll laugh out loud too many times to count and it'll pull on your heart strings.

I love how down to earth this is written. As women, we can be strong and independent but, we can all relate to the vulnerability of Laura, the main character through our own life experiences.

If you've ever done on-line dating, or not, pick it up, you'll love it!!! It keeps you engaged.... the hilarity (because it certainly is), and how dating is truly a soul searching experience of getting to know yourself.

AND never give up hope!
