[5.0 out of 5 stars A valuable resource for Chronic Fatigue sufferers!](#)

By [Dr. David Baltimore](#) on November 26, 2015 [Format: Kindle Edition](#) | [Verified Purchase](#)

Having a friend with CFS, I have witnessed her struggle, over more than a decade, with the traditional orthodox medical approach - they have been little to no help to her at all. Her deep dives in alternative and complementary healthcare have provided more relief. She has yet to go to a good homeopath, and I am suggesting to her that she take this book to a homeopath and get to work!

This book focuses on the homeopathic treatment of CFS, and what a powerhouse of information it holds. It is clear, concise, well laid out, easy to read and understand, and chock full of links and resources.

As for the naysayers of homeopathy, they (loudly) claim that high dilutions of a homeopathic remedy have no molecules left of the of the original substance. Ms Solomon's section on "Homeopathy and Research" addresses that point. She presents several recent pieces of research that confirm there ARE nanoparticles (1 part per billion) present in 30c potencies of remedies, and higher. This quote from the book sums it up: "Dogs can smell substances in parts per billion or even trillion. . This is verifiable science and what the legal world calls 'Back Letter Law.' If animals can detect a substance in such small quantities, why is inconceivable that the human immune system can detect a substance even in great dilution?"

If you have CFS or know someone with the illness, you really should check out this book.

[5.0 out of 5 stars Recovered and is now helping others get better. It is comprehensive and well written by someone ...](#)

This is a welcome to book on a controversial and puzzling condition. It also comes from a unique perspective of someone who has suffered with the illness, recovered and is now helping others get better. It is comprehensive and well written by someone who is an expert from both sides of the patient practitioner equation.

Modern life has given rise to chronic health conditions as opposed to the more acute illnesses of previous centuries. Modern life is more insidiously toxic than at any time in the past with many tens of thousands of new chemicals in the environment the effect of each let alone in combination is not fully understood.

Conventional medicine has failed to truly identify and find effective remedies for this, as is the case with many chronic conditions. Holistic medicine recognizes the multi factorial origin of this malady and can produce a multi factorial and individualized and effective solution. Diane uses the perspective from her knowledge of homeopathy, herbs and Nutritional medicine to provide solutions that can be tailored to the needs of the patient.

This illness varies from a short lived and inconvenient malady to a serious long lasting and life threatening disease.

As someone, who like Diane has suffered with the condition and who has been fully cured her book provides hope and the way forward for those who led a full and productive life and have been stricken by this most debilitating of diseases. Highly recommended.

It's an easy read and filled with great references for further research. A must read for those who seek healing and want to learn about a variety of healing techniques.

I bought this book because a friend's daughter has CFS- has been sick for years. The author seems to really know her stuff, writes well and the book is pretty easy to read. There are lots of links and resources. And there is info in there about the homeopathic approach that is probably not available anywhere else, unless maybe in professional homeopathy books.

I hope it helps my friend's daughter. It is awful illness - wrecking people's lives.

In my opinion, it'sA MUST READ!!!!

[5.0 out of 5 starsA must for everyone with an interest in CFS, and homeopathy!](#)

What a wealth of information! Hopefully this book will show up as a reference for everyone researching Chronic Fatigue Syndrome – a truly complicated illness. If I got nothing else out of this book, it was a true appreciation of not only what a CFS patient suffers, but also the COMPLEXITY of its diagnosis, treatment options, possible origin(s), etc. etc. etc. Whether a practicing Homeopathic doctor or patient, an allopathic physician, a CFS researcher, or, like me, someone who is keen to learn as much as possible about homeopathy, this book has a great deal to offer. Thank you, Diane, for putting so much together in one resource!
